Profile

Computer Science graduate (B.Sc., Unity University, 2026, GPA 3.6) who builds full-stack web apps end to end and puts them live: React front ends, Node and Express APIs, MongoDB and MySQL databases. Shipped four projects, from a MERN book marketplace with admin moderation to a voice-controlled 3D experience, and is comfortable debugging hosting and deployment issues independently. Uses Cursor to move faster while keeping code clean and maintainable. Looking for an internship or junior role with a team that mentors.

Projects

Dersan Book Marketplace

Personal project · MERN

MongoDB · Express.js · React.js · Node.js · JWT · Cloudinary · [View live ↗](#)

- Built a full-stack marketplace where users buy, sell and message each other about secondhand books, plus a community feed with likes, comments and hashtags.
- Implemented JWT authentication, Cloudinary image uploads, notifications, and user reporting with an admin moderation dashboard.

MERN ThinkBoard

Personal project · 2025

MongoDB · Express.js · React.js · Node.js · [View live ↗](#)

- Built a full CRUD note-taking app end to end: React front end, Express.js REST API, MongoDB storage.
- Added API rate limiting and a responsive dark-themed UI to keep the app stable under repeated requests.

Voice-Controlled 3D Cube

Personal project

Three.js · Web Speech API · JavaScript · [View live ↗](#)

- Created a browser-based 3D scene controlled entirely by voice: commands like "spin", "faster" and "rainbow" change rotation, color and scale in real time.
- Combined the Web Speech API for recognition with Three.js and WebGL for rendering.

All-In-One Travel Platform

Final-year project · Team

HTML · CSS · Bootstrap · PHP · MySQL · [View live ↗](#)

- Built the front end of a travel platform that connects users with hotels, rides, travel agents and curated packages, working in a group to deliver the final-year capstone.

In development: Tatari (focus and productivity) and Tally (budgeting).

Skills

Frontend

HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Bootstrap, Three.js, responsive design

Backend

Node.js, Express.js, PHP, REST APIs, JWT authentication

Databases

MongoDB, MySQL

Tools

GitHub, Cursor (AI-assisted development), Figma, Photoshop, Canva

Education

B.Sc. Computer Science

Unity University, Addis Ababa
2021 – 2026 · GPA 3.6

Software development, databases, algorithms, operating systems, networking and web technologies.

Certification

Inclusive Open Source Community Orientation (LFC102)

The Linux Foundation · 2026

Achievement

Academic Achievement
Certificate, Unity University (Apr 2026) for a GPA above 3.5.

Strengths

Communication, team collaboration, fast learner, problem solving, attention to detail, adaptability.

Languages

Amharic
English (fluent)
Arabic (conversational)
